

Woman entrepreneur blazes new trail

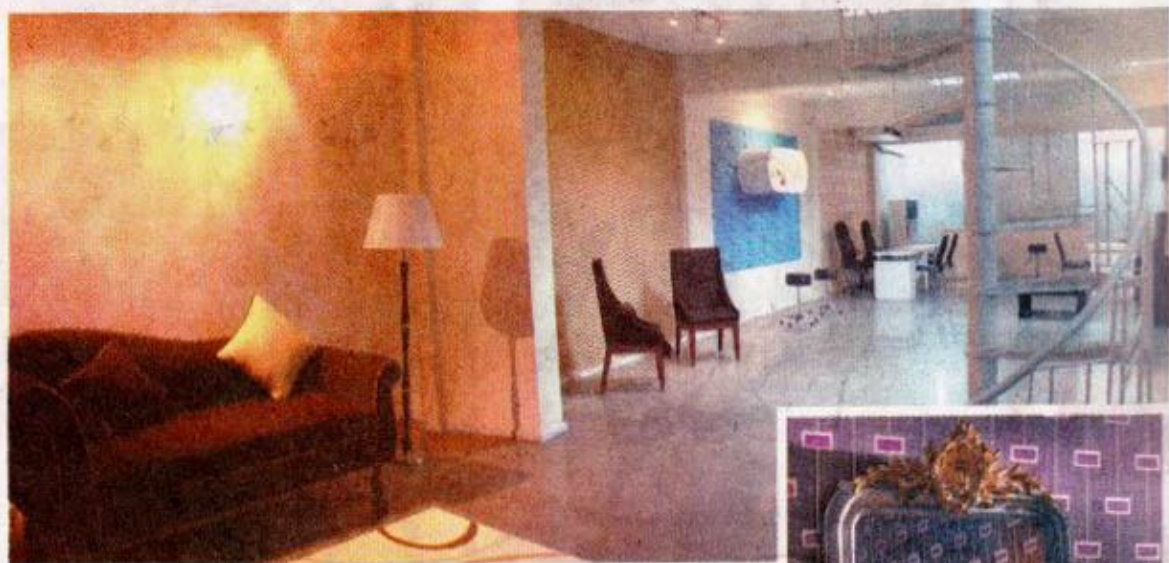

SL's first Wallpaper & 3D Wall tile showroom launched

Sri Lanka's first-ever exclusive Wall Paper and 3D Wall Tiles showroom, Wall Art (Pvt) Ltd, was launched yesterday, at 194F, Nawala Road, Narahenpita, Colombo 05 offering Sri Lankan customers an infinite array of new design options for their walls.

Kishani Kaluarachchi, Managing Director of Wall Art (Pvt) Ltd said, "We are the only exclusive retailer of globally renowned brands of wallpaper in Sri Lanka. We offer over 1,000 designs of wallpaper from Europe and the U.S. to suit any mood, taste or budget. We also provide other design options such as 3D tiles for walls ideal for hotels, restaurants, bars, shopping malls, apartment complexes and homes".

"Sri Lanka is a new and vibrant market for wall paper and we are seeing keen interest in decorative products for walls. Painted finishes, although great in some spaces, don't equate to the opulence a few rolls of wallpaper can provide. One can now create breathtaking spaces in their home or workplace by choosing from our extensive range of wallpaper. Customers can also try an 'accent or feature wall' to add a layer of sophistication to a room for a fraction of the cost, Kaluarachchi added.

"Wall Art has a team of skilled installers trained overseas who are capable of wallpapering a room in 4 to 6

hours. All our adhesives are imported from Europe to ensure that the highest standards are maintained. A bonus is that we offer free full installation services with all purchases of wallpaper", she added.

These eco-friendly wallpapers are manufactured from material that emits no aerosols or lead. When installed in air-conditioned rooms, Wall Art's vinyl range of wallpaper does not allow the external transfer of cool air. This permits one to switch off the air conditioner sooner, since the room retains the cool air. Due to this, it is estimated that a household can save up to 7%

on air-conditioning bills. Some ranges of wallpaper are made from wood from sustainably managed forests. In fact most importantly, all these wallpapers are recyclable.

Additionally, Wall Art (Pvt) Ltd is the first and exclusive distributor of 3D wall tiles in Sri Lanka. "We offer over 18 designs to match specific tastes. Our 20"x 20" 3D tiles can be used to create unique walls at home, in apartment complexes, hotels, casinos, restaurants, night clubs, or offices. They are lightweight and durable and also extremely easy to install. Made from pure plant fibre material, they are eco-friendly, sound absorbent and provide thermal insulation. Tiles are available in white and can be painted over in any colour to match your interiors", Kaluarachchi concluded.
