

Wall Art introduces customized HP latex wallpaper

Wall Art, the exclusive wallpaper and 3D tiling company, introduced yet another novel concept in wall decor with their custom wallpaper.

Kishani Kaluarachchi, Managing Director, Wall Art said, "You will love the freedom of decorating your walls with custom wallpaper. You can design the look and feel your desire. With Wall Art's power of digital printing, you can create vivid interiors that will stand out from the rest."

Custom wallpaper is easily installed within a matter of hours on any existing wall and lasts for 6-20 years when HP PVC-Free Wallpaper is printed with HP latex inks which is used for all products. It is also eco-friendly with global certifications from Greenguard for Indoor Air Quality (IAQ) and Children and Schools Certification

Criteria. Unlike other decorative materials custom wallpaper has no hazardous smells. Inks and paper used are 100% safe to human health. Further, it is mold and mildew resistant and flame resistant with a Class A approved fire certification.

"We can help customers design the ideal imagery that best fits their requirements- cartoon characters for kids' rooms, beautiful scenery for the office boardroom or an abstract piece of art for a lounge or hall at home. Custom wallpaper can be used almost anywhere - at home, office, hotels, restaurants, schools, hospitals and shopping malls. The only limit is your own imagination. If you can imagine it - we can create it!" Kaluarachchi added.
